

As of March 1, 2017 Newton Street Dental will be participating with Smiles For Life, an organization set up through members of the Crown Council, an alliance of dentists worldwide that continue their education and serve their communities through charitable work while focusing on treating patients, not just teeth.

The professional whitening done in the office will help to raise money for the seriously ill, disabled, and underprivileged kids in their local communities all over the world.

After the appointment, the patient will make their payment for their teeth bleaching procedure to the Smiles For Life Foundation. 50% of that payment will be designated for a local charity. The remainder is given to a Smiles For Foundation approved charity.

Smiles For Life has provided donations to St. Jude's Children's Hospital, Tribute to the Troops, Ronald McDonald House, and the Salvation Army.

The website to donate is [smilesforlife.org](http://smilesforlife.org). Whiten your teeth and help a child.
